

## Call for Presentations KSEE 2015

Planning for KSEE 2015 is starting early. We invite presenters to submit a proposal for a presentation. Any presenter is welcome to submit a proposal consisting of an abstract and a brief biography. The presentation should fit the topic of the KSEE.

For 2015 the topic is:

### Managing knowledge: How to capture, store, find, use, and keep knowledge up-to-date?

Knowledge is a core asset of high-tech companies. It facilitates development of technology and products, execution of projects, production, installation, and commissioning, and support throughout the life cycle. Knowledge is more than information. Wikipedia defines knowledge as “*Knowledge is a familiarity, awareness or understanding of someone or something, such as facts, information, descriptions, or skills, which is acquired through experience or education by perceiving, discovering, or learning.*”

Many questions float around, e.g. in what form do we store knowledge (textual, visual, formal models)? How to embed information so that people can use and apply it as knowledge? What tools are effective to cope with a huge amount of knowledge?

The timetable for KSEE 2015 is:

- Submission deadline: Friday October 10, 2014
- Selection of presentations, notification of acceptance or rejection: Friday November 14, 2014
- Final program, including keynote speakers, ready Friday December 19, 2014
- KSEE 2015: Thursday June 4, and Friday June 5

The program committee will review and select presentations that fit the topic, are attractive for the KSEE audience, and are complimentary. We look for presentations that combine practical cases with insightful lessons learned.

Proposals can be send to [ksee.hibu@gmail.com](mailto:ksee.hibu@gmail.com).

Feedback, questions, and suggestions for topics for future KSEEs can also be send to [ksee.hibu@gmail.com](mailto:ksee.hibu@gmail.com).
